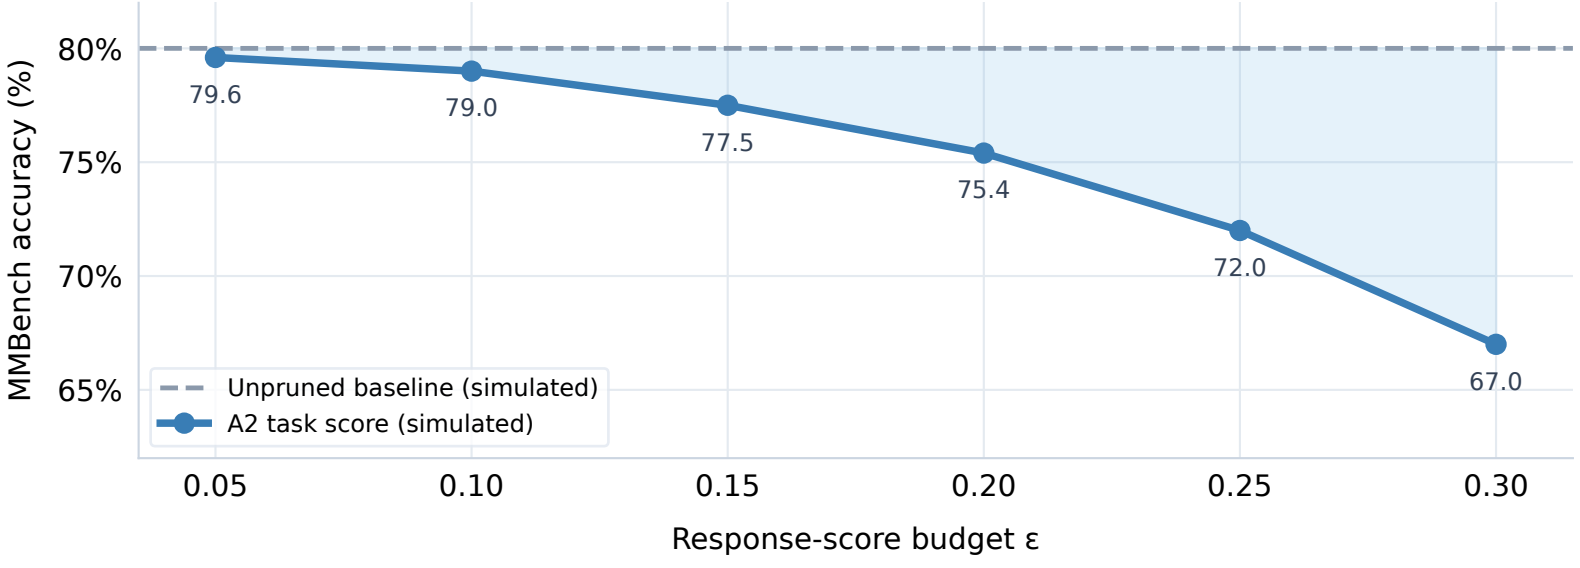
Effect of response-score budget ε

Qwen3-VL-2B | MMBench | illustrative layout

SIMULATED EXAMPLE — not experimental results



Illustrative mean actual pruning rate

ε=0.05	ε=0.10	ε=0.15	ε=0.20	ε=0.25	ε=0.30
11.0%	20.0%	27.5%	34.0%	39.5%	44.5%

ε limits cumulative response share, not the fraction of neurons removed. Y-axis is zoomed.
